

# What to report : (and how?)

- max 2 pages + reference

Report the:

- 1) Findings in a reproducible manner  
"a separate file README must also be provided along the code"
- 2) clearly show what you did, which steps have you used - well communicate what you have introduced
- 3) what are the contributions of the steps you have done to the models performance - with comparisons
- 4) give information about details of steps: values, folds, exact algorithm...
- 5) report test error changes etc. as metrics
- 6) Have several properly implemented BASLINE ALGORITHMS FOR THE SAKE OF COMPARISON!

what you did

why

show how it effects
